Multiplexing Solution for Proteins and Nucleic Acids

Luminex® 200™

Flexible Multiplexing Technology

The Luminex® 200™, a flow-based reader, sets the standard for multiplexing with thousands of instruments sold globally and more than fifty FDA 510(k) cleared assays using xMAP® Technology. The ability to perform up to 100 different tests in a single reaction volume, and to use either magnetic beads or plain polystyrene beads makes this instrument a popular choice for laboratories needing greater flexibility. Additionally, the Luminex 200 is able to offer higher sample throughput with a 96-well plate read time of only 45 minutes.
